New A-Series Speakers Redesign

The **New A-Series Speakers lineup** showcases an exquisite crafted gold finish that elevates a sleek and classy appearance. The New A-Series Speakers was engineered into every aspect, from its precision engineering to the luxurious visual appeal, is a testament to Pioneer's commitment to delivering not just sound quality, but a complete audio and visual sensory experience.

Superior Open&Smooth™

With Pioneer's **Open&Smooth™** sound technology, specifically developed to overcome the challenges of sound reproduction in the car's interior cabin, the advanced technology unveils superior sound directivity for heightened audio immersion and clarity.

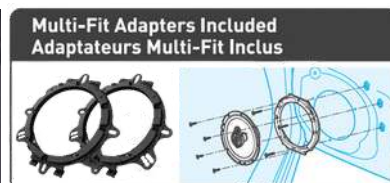

Carbon & Mica Reinforced IMPP Cone

With our revolutionary **Carbon & Mica Reinforced IMPP Cone** technology, the New A-Series Speakers feature enhanced rigidity and strength, reduced cone resonance, improved frequency response and moisture resistance, immersing you in deep and rich resonating audio bass.

Specially Designed Diaphragm & Multi-Fit Adapters

The New A-Series Speakers has a **specially designed diaphragm** that minimizes self-resonance for smoother frequency response and accurate treble reproduction, delivering an unparalleled clear mid and high tones with low distortions, immersing you in pure audio bliss. All New A-Series Speaker comes with a Multi-Fit Adapter that fits most ASIAN Vehicles and Models.
